- Wheat Germ Extract

#### For Use By:

- Mechanics
- Painters
- Printers
- Plumbers
- Service Persons
- Industrial Workers
- Janitors and Many More

**Foaming Gent-L-Kleen® Waterless Hand Cleaner is not a soap; it is a hand cleaning solution** used to remove medium to heavy-duty soils. Water should not be used except to rinse hands where water is available. When water is not available, simply dry hands with a paper towel or rag.

**Foaming Gent-L-Kleen® Hand Soap is a premium, general washroom foam soap.** As such, a water rinse is required with its use.

Both Foaming Gent-L-Kleen® Hand Soap and Waterless Hand Cleaner are part of the Gent-L-Kleen® Gent-L-Green™ Line. They are available in a 500-ml foaming dispenser bottle yielding **more than 400 applications per 500-ml bottle.**

**Skin Armor™ Barrier Foam provides a unique, invisible skin shield** with the moisturizing power of five skin conditioners. It does not contain any silicone. Skin Armor™ shields skin from chemicals, dyes, dirt, oil, grease, solvents, paints, fiberglass fibers, resins,

epoxies, alkalis, acids, inks, tar, shop grime and more.

Skin Armor™ is excellent when working with small parts where gloves may be burdensome. It gives touch and feeling sensitivity not obtainable when using gloves. However when used with gloves, Skin Armor™ allows skin to flex and breathe helping reduce under glove perspiration and shielding skin from latex. You get **more than 350 applications per 17.5 ounce can.** One application lasts up to four hours. Water alone will not remove.
